DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. **Claims 1-2** are rejected under 35 U.S.C. 102(b) as being anticipated by Basel U.S. Patent 6,341,166.

Regarding **claim 1**, Basel teaches an apparatus for volume control devices (see Figs. 2, 3, and respective portions of the specification), comprising:

a first volume control device and a second volume control device which correspond to source correction equalization unit (240, Fig. 2, 3). The source correction equalization unit (240) provides equalization correction to current source medium (302) in order to maintain desired spectral balance of reference source medium (202; see col. 5, lines 26-43);

a position control device which corresponds to control interface for changing from source (202, Fig. 2) to (302, Fig. 3; see col. 4, lines 11-27);

a controller which corresponds to power spectrum analyzer 210, reference spectral balance data memory (212), current source spectral balance data memory

Art Unit: 2615

(214), compute unit (220), spectral balance correction data memory (232, see Figs. 2, 3) for setting spectral balance correction data in spectral balance correction data memory (232) to maintain desired spectral balance of reference source medium (see col. 5, lines 15-43).

Regarding **claim 2**, Basel further teaches the drive apparatus for volume control devices according to claim 1, wherein source correction equalization unit (240, Fig. 2, 3) including a plurality of the second volume control devices to maintain desired spectral balance of reference source medium (see col. 1, lines 12-34).

Allowable Subject Matter

3. **Claims 3-4** are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The following is a statement of reasons for the indication of allowable subject matter:

Regarding claim 3, the prior art of record fails to teach or suggest an assigner for assigning a plurality of audio signals corresponding to arbitrary ones of the second volume control devices to the first volume control device.
